Don Bosco Institute of Technology, Mumbai – 400070

Report on "Outreach Program"

Title : Session on "Interactive Learning through Google Forms"

Date : 18th February, 2020

Time : 1:00 pm to 4:30 pm

Venue : Computer Center, A-wing, 2nd Flr, DBIT

Participants : School and ITI Faculties from Institutes across Maharashtra (Teaching Vocational Subjects)

Resource Person : Ms. Sana Shaikh, Ms. Sejal Chopra and Ms. Shafaque Syed

Organzing Department / Committee / Authority : Computer Engineering Department, DBIT

Objective :

1. An initiative to share knowledge with other educational institutions.

2. To enhance college branding and visibility in other schools

Outcomes :

1. Participants will be able to collect and organize information textual and multimedia based with Google Forms.

2. Participants will be able to get quick reponses for survey/ quizzes/ polls etc.

3. Participants will be able to organize and analyze the collected responses quickly.

4. Participants will be able to collaborate with students and other fellow faculty for enhancement of Teaching Learning Process.

Excerpt : Session on "Interactive Learning through Google Forms""

Report :

Topics covered:

- Conducting a Survey and Data Analysis

- Creating Quizzes

- Inserting Images and Videos

- Taking Feedback

Insights and Understandings:

Forms are among the internet's most versatile tools. Whether you need a contact form or a checkout page, a survey or a student directory, a form is all you need to easily gather that information. With Google Forms, it only takes a few minutes to make one for free.

Google Forms is a web-based app used to create forms for data collection purposes. Students and teachers can use Google Forms to make surveys, quizzes, or event registration sheets. The form is web-based and can be shared with respondents by sending a link, emailing a message, or embedding it into a web page or blog post. Data gathered using the form is typically stored in a spreadsheet. Although there are other online survey apps, Google Forms is an excellent free option. With the use of Google forms, the following feature can be used which are difficult to achieve in offline survey.

1. Create Surveys to Meet Curriculum Objectives

2. Ask Various Types of Questions

3. Apply Validation Options to Control Data Entry

4. Create Professional Looking Forms using Themes

5. Multiple Ways to Administer Forms

Google Forms—along with Docs, Sheets, and Slides—is part of Google's online apps suite of tools to help you get more done in your browser for free. It's easy to use and one of the simplest ways to save data directly to a spreadsheet, and it's the best sidekick to Google Sheets' spreadsheets.

When you need to gather data for your spreadsheets, a form is your best friend.

Faculty Experience:

Our experience of knowledge sharing with the Faculties of ITI and various schools was gratifying. The kind of feedback received from participants was truly motivating. Interaction with faculty members helped us understand their requirements with respect to evaluation and assessment of courses. This, let us help the participants with making things simpler and optimize their course work. During the session participants designed their own forms and were convinced to use the Google form utility for their assignments, projects, assessment and conducting feedbacks.
